PROFILE

Senior Applied AI Engineer with 5+ years building production ML systems — from multimodal LLM pipelines and RAG architectures to cloud-native inference infrastructure on AWS and Azure. Delivered enterprise AI solutions generating €500k+ revenue for Allianz, Volkswagen, and Porsche. Background spanning industrial field engineering, enterprise technology consulting, and applied AI, providing a practical understanding of noisy real-world data and operational system constraints.

KEY ACHIEVEMENTS

- Architected multimodal AI systems converting receipt images into structured FMCG retail intelligence at international scale.
- Implemented model observability frameworks achieving **50% reduction in mean time to detect and resolve** critical production issues.
- Delivered enterprise AI and data platform solutions for Allianz, Volkswagen, and Porsche, generating **€500k+ revenue**.
- Migrated **~1 PB** of legacy infrastructure from Cloudera to AWS, rearchitecting pipelines using Spark on EMR with modern CI/CD.

CORE SKILLS & SPECIALISATION

AI & MACHINE LEARNING

Python · PyTorch · TensorFlow · Hugging Face · LoRA/PEFT ·
RAG · Multimodal Processing · LangChain · LlamaIndex ·
HayStack · Model Evaluation Pipelines

MLOPS & LIFECYCLE

MLFlow · DVC · SageMaker Pipelines · Apache Airflow · GitLab
CI/CD · Model Serving Architectures

OBSERVABILITY & OPERATIONS

Prometheus · Grafana · ELK Stack · Drift Detection · AI System
Observability

CLOUD PLATFORMS

AWS (Bedrock, SageMaker, Lambda, SQS, EMR, API Gateway,
Glue) · Azure (Synapse, Azure OpenAI)

INFRASTRUCTURE & ORCHESTRATION

Kubernetes (EKS, AKS) · Docker · Terraform · ArgoCD · Argo
Workflows · FastAPI

DATA ENGINEERING & LANGUAGES

PySpark · SQL · Data Pipeline Architecture · TypeScript · Go ·
Rust

WORK EXPERIENCE

YouGov (formerly GfK)

July 2024 – Present

Machine Learning Engineer

Nuremberg, Germany

- Architected and deployed a production **Receipt Intelligence Platform** combining OCR, vision-language models, and LLM pipelines to extract structured FMCG retail data across international receipt formats.
- Built scalable inference infrastructure using AWS Bedrock, Lambda, SQS, MongoDB, and Terraform enabling automated high-volume retail data processing.
- Designed data-centric evaluation pipelines including synthetic dataset generation and error-driven feedback loops to improve model robustness against noisy real-world inputs.
- Implemented MLOps framework for continuous model training and deployment using GitLab CI/CD, SageMaker Pipelines, and AWS API Gateway.
- Developed model observability systems using ELK stack for comprehensive endpoint performance tracking, latency monitoring, and operational regression detection.

WORK EXPERIENCE

Machine Learning Reply GmbH

April 2022 – May 2024

Machine Learning Consultant

Munich, Germany

- Delivered applied AI solutions and data platforms for enterprise clients including **Allianz, Volkswagen, and Porsche** as part of a four-person team, contributing to €500k+ revenue growth.
- Built containerised, privacy-preserving **RAG Question Answering API** on Azure using OpenAI embeddings, GPT-3.5, and FastAPI to support legal knowledge workflows for lawyers.
- Migrated ~1 PB of data from Cloudera to AWS, rearchitecting Apache Pig and Hive jobs into Spark on EMR with GitLab and Apache Airflow CI/CD.
- Managed SaaS Kubernetes platform for an insurance client, orchestrating data pipelines with Argo Workflows and deployments via ArgoCD.
- Defined Prometheus metrics and built Grafana monitoring dashboards for a Kubernetes data platform, achieving **50% reduction in MTTD** for critical issues.
- Designed secure enterprise ingestion pipelines integrating on-prem APIs with Azure Synapse for client security visibility dashboards (PowerBI).

Fraunhofer IKS

May 2021 – March 2022

Data Scientist (Research Engineer)

Munich, Germany

- Developed hybrid anomaly detection systems combining deep learning with rule-based reasoning for safety-critical industrial environments.
- Applied contrastive learning (MoCo) to improve robustness in sparse anomaly detection scenarios.
- Collaborated with domain experts to transition research prototypes into production-ready system designs.

EDUCATION

M.Sc. Data Analytics · Universität Hildesheim

2019 – 2021 · Grade 1.6 (German scale — equivalent to Irish 2:1 Honours, top 15%)

B.Sc. Electrical & Electronic Engineering · University of Ibadan

2008 – 2013 · First Class Honours

CERTIFICATIONS & LANGUAGES

- | | |
|-------------------------------------|--------------------------|
| • AWS Machine Learning Specialty | • English — Fluent (C2) |
| • AWS Solutions Architect Associate | • German — Advanced (B2) |
| • AWS Cloud Practitioner | • French — Basic (A2) |
| • Terraform Associate | |
| • Azure Fundamentals | |
| • TELC Deutsch B2 & B1 | |

VOLUNTEERING & COMMUNITY

ReDI School of Digital Integration — Data Analytics Instructor

Feb 2023 – Jan 2025

AWS Community Builder

Apr 2021 – Apr 2025

DeepLearning.AI — NLP Tutor

Feb 2021 – May 2021
