Introduction

Seasoned Data Scientist with extensive experience spanning automotive, insurance, information technology, research, and oil & gas industries. Proficient in harnessing Cloud Technologies (AWS and Azure), Python, Typescript, and SQL, to develop data-driven solutions to address complex challenges.

Work Experience

Machine Learning Consultant at Machine Learning Reply GmbH, Munich
April 2022 to Present

- Played a key role in teams of four, driving revenue surpassing 500 thousand Euros by implementing Machine Learning projects for renowned German corporations including Allianz, Volkswagen, and Porsche.
- Built and deployed a containerized and privacy-preserving Retrieval-Augmented Generation (RAG) Question Answering API on Azure, leveraging OpenAI embeddings and GPT-3.5, and exposed it using FastAPI to support lawyers in legal case creation.
- Effectively migrated approximately 1 Petabytes of data from Cloudera to AWS for a client, rearchitecting Apache Pig and Hive jobs to Apache Spark on AWS EMR. Implemented lean continuous deployment workflows with Gitlab and Azure Managed Airflow

Data Scientist at Fraunhofer IKS, Munich
May 2021 to March 2022

- Created hybrid anomaly detection system for industrial drills, combining deep learning (VAE) and rule-based methods. Collaborated with domain experts to ensure effectiveness in production by gathering insights and refining models
- Employed cutting-edge Contrastive learning methods (MoCo) to enhance accuracy in the development of deep-learning based anomaly detection pipelines.

Field Engineer at Schlumberger, Port-Harcourt
December 2015 to April 2018

- Managed multimillion-dollar projects to revitalize oil wells, conducting mathematical simulations, laboratory experiments, and preparing job execution programs for both land and offshore rigs.
- Installed on-site sensors to collect essential data on pressure, speed, and temperature, conducting real-time monitoring to analyze data and coordinate job progress effectively, ensuring top-notch client service delivery.
- Oversaw project management tasks, including personnel, product, and material preparation for site deployment, resource management on-site, financial management during operations, and client debriefings.

Education History

Master's in Data Analytics at Universität Hildesheim
2019 - 2021, **Grade 1.6**

Bachelor's in Electrical and Electronic Engineering at University of Ibadan
2008 - 2013, **Grade: First Class honors**

Core Skills & Specialization

Data Science and Data Engineering
Pyspark, SQL, AWS Glue, Azure Synapse, AWS EMR,
PyTorch, Tensorflow, Hugging Face, Langchain, LlamaIndex, HayStack

Machine Learning Operations (MLOps)
Terraform, Sagemaker, MLFlow, Flyte, ArgoWorkflows, Gitlab, Kubernetes (EKS, AKS), Docker Swarm, Prometheus, Grafana,FastAPI, AWS API Gateway, AWS Lambda, AWS Route 53, DVC

Volunteer Work & Affiliations

Data Analytics Teacher at ReDI School of Digital Integration, Munich
February *2022 to Present*

AWS Community Builder
April 2021 to Present

NLP Tutor at Deep Learning.ai
February 2021 to May 2021

Certifications

1. **AWS Machine Learning Speciality**
2. **AWS Solution's Architect Associate**
3. **AWS Cloud Practitioner**
4. **Terraform Associate**
5. **Azure Fundamentals**
6. **TELC Deutsch B2**
7. **TELC Deutsch B1**

Language Proficiency

1. **English** - Fluent - C2
2. **German** - Advanced - B2
3. **French** - Basic - A2
